

Top 250 MSSPs

2023 EDITION

Welcome to the Top 250 MSSPs 2023 Edition. The research and rankings leverage MSSP Alert's seventh annual worldwide survey of MSSPs (conducted April through August 2023) along with MSSP Alert's editorial coverage.

The resulting rankings are based on:

- > **Annual recurring revenues**
- > **Profitability**
- > **Business growth rate**
- > **Cyber professional headcount**
- > **Managed security services offered**
- > **MSSP Alert's editorial coverage of MSSPs worldwide**
- > **Third-party industry honors (i.e., Gartner, Forrester, IDC, etc.)**

Executive Summary: The Top 250 MSSPs and associated survey participants continue to grow faster than the overall managed security market. Indeed, survey participants expect to grow annual MSSP revenues by 20% in 2023 vs. 2022. That's faster than the overall cybersecurity services market. Canalys expects the overall cybersecurity services market to grow by 14% in 2023.

This MSSP growth year over year is smaller than last year's growth rate of 26%, and the rate at which it outpaces the overall security services market growth is also smaller. Last year we cited a 13% growth rate for the overall market. Macroeconomic conditions likely slowed the growth rate. But it's still a healthy rate that's faster than the overall market. Here's why.

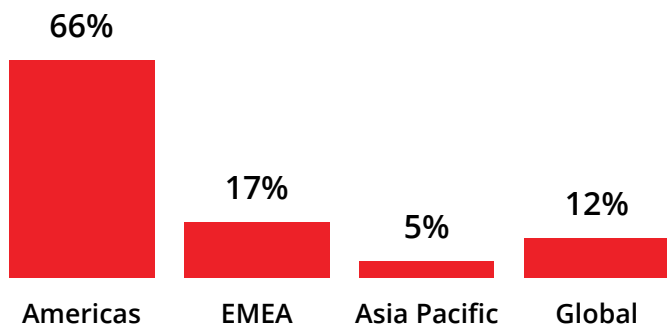

First, the threat environment continues to fuel MSSP growth:

- > Continuing cyberattacks, including the too common phishing and ransomware, against businesses of all sizes.
- > Continuing for-profit supply chain cyberattacks.
- > Continuing nation-state attacks and geopolitical events such as Russia's invasion of Ukraine, now in its second year.

Meanwhile the market for MSSP services continues to evolve. Here are some factors to consider:

- > MSPs are partnering with MSSPs to provide cybersecurity to end customers.
- > The lines between MSPs and MSSPs are likely to blur over the next few years as more MSPs add cybersecurity services to their portfolios.
- > More cyber insurance carriers are insisting that end customers leverage a certain level of cybersecurity services, which is dragging many MSPs deeper into the cybersecurity market.
- > The cybersecurity insurance crisis – vendors have partnered with cybersecurity insurance providers to offer discounts to customers who use their products.
- > The introduction of cyber warranties – brimming with Datto DNA, Cork made its debut this year, marketing itself to the MSP market. The company offers a cyber warranty solution built for MSPs and their customers. It's not the first cyber warranty company, but it may be the first one designed specifically for MSPs and their end customers.

Where are the majority of your managed security customers located?

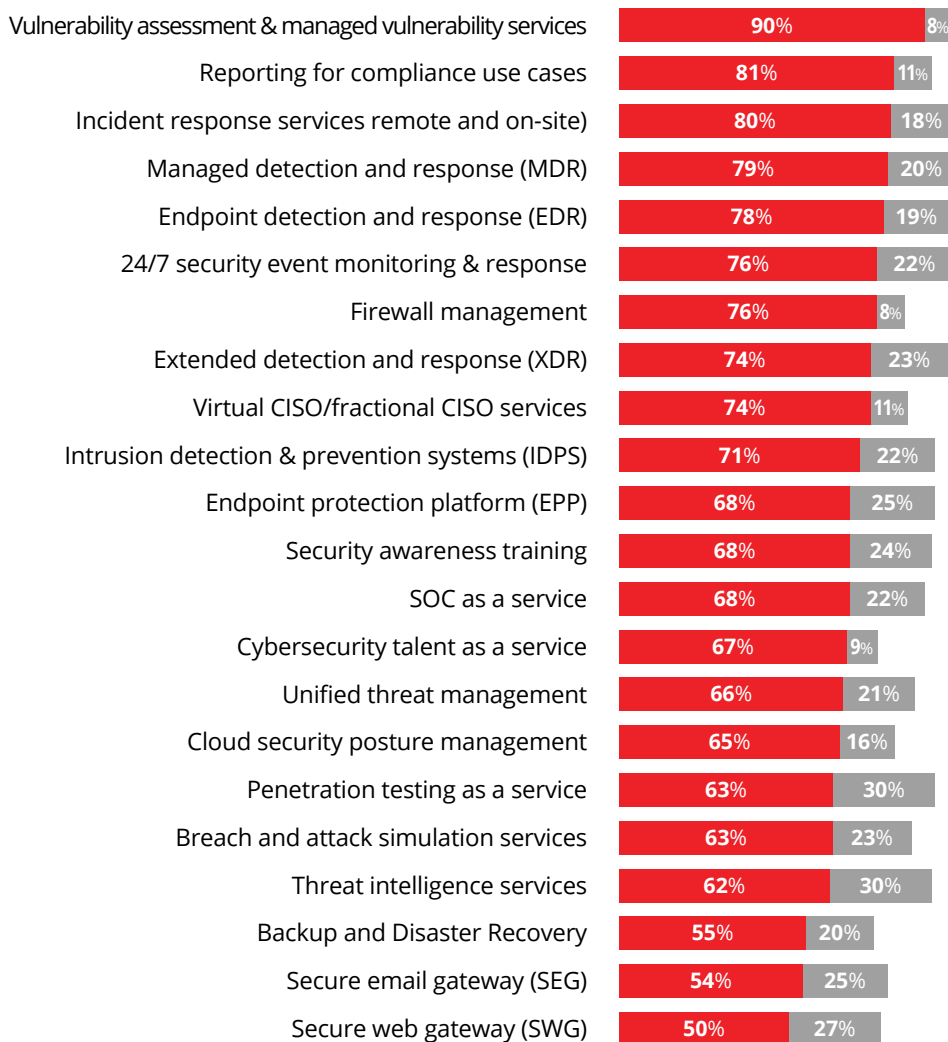

Was your MSSP business profitable in 2022?

Managed Security Services Offered

■ Provide on our own

■ We partner

MSSP Alert generally adheres to Gartner's definition of an MSSP, broadly defined to include companies that offer one or more of the managed security services above. The bar chart represents the percentage of MSSP Alert survey participants offering each service – either directly or via partnerships.

Most of these numbers have remained stable in 2023 compared to what we reported in our 2022 report. However, we did see a few services edge up in terms of what MSSPs reported they offered themselves in-house.

Those include:

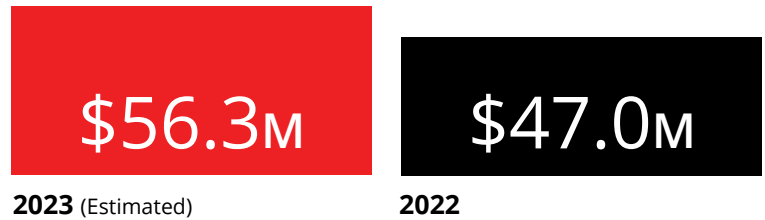

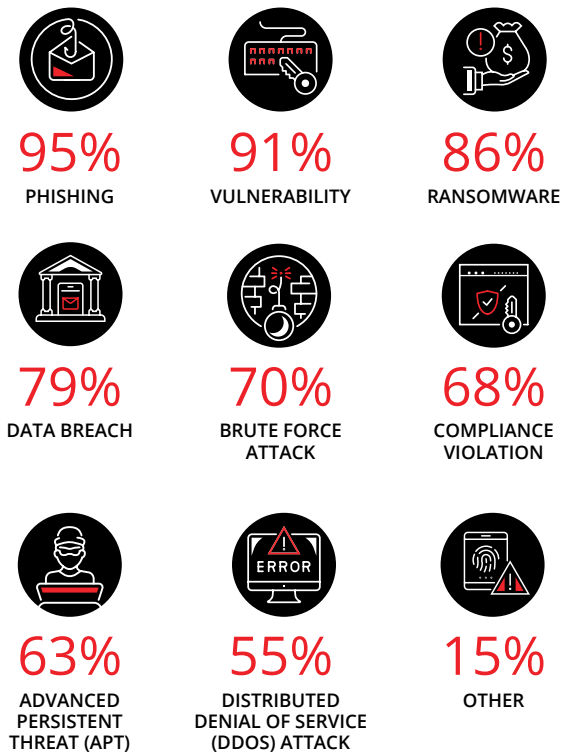

- > **Penetration testing as a service** this year at 63% last year at 57%
- > **Reporting for compliance use cases** this year 81% and last year 75%
- > **Vulnerability assessment and managed vulnerability services** went to 90% from 84% last year - nearly everyone offered it both years, but more MSSPs brought it in-house in 2023.

What type of security attacks and/or incidents has your MSSP mitigated for customers in 2023?

These attacks weren't necessarily successful attacks. Rather, the data represents the attack vectors that prompted an MSSP response for end-customers.

Top Cybersecurity Vendors Assisting MSSPs

MSSP Alert survey participants were asked to describe which three vendors most greatly assist their managed security services efforts. The 10 most-mentioned vendors are listed below. In a continued sign of market fragmentation, survey participants mentioned 186 different hardware, software, cloud, distribution and services vendors that assist their cybersecurity efforts.

Are larger MSSPs different from smaller MSSPs*?

We separated our group of the Top 250 in half to look for trends among these two groups. Here are some of the findings.

- Smaller MSSPs were more likely (86%) to be self-funded by owners. For larger MSSPs, half said their funding was self-funded by owners, 29% were funded by private equity and 8% were funded by publicly held stock.
- There was no statistical difference in the percentage of MSSPs who were profitable between the smaller MSSP segment and the larger MSSP segment.
- Larger MSSPs were more likely to run their SOC entirely in-house (85%). Half of the smaller segment of MSSPs ran their SOC entirely in-house while 33% took a hybrid approach (a portion run in-house and a portion outsourced to a third party) and only 14% outsourced the whole thing to a third party.
- Almost all of the larger MSSPs (90%) provided 24/7 security event monitoring and response for threat detection use cases on their own. While 61% of the smaller MSSPs provided these services on their own, 35% partnered with another company for these services and 4% of the smaller MSSPs didn't offer the service at all.
- This kind of difference was reflected in many of the other services that MSSPs offered, with larger MSSPs the most likely to provide many of their services via an in-house solution with a smaller percentage but still a majority of the smaller MSSPs providing it in-house and many others offering the service via a partnership.
- An exception to that was backup and disaster recovery, 65% of the smaller MSSPs provided their services on their own compared to 45% of the larger MSSPs. A full 34% of the larger MSSPs said they did not provide this service at all.
- Security awareness training was another exception. Percentages offering this service on their own was similar between larger and smaller MSSPs.
- When asked to name the vendor most likely to contribute to the business's success, Microsoft was a big winner across the board. However, twice as many larger MSSPs named Microsoft than smaller MSSPs did.

*MSSP size definitions:

Small MSSPs: Revenue below 2023 median revenue

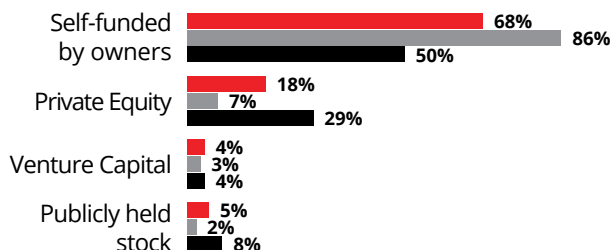

Large MSSPs: Revenue above 2023 median revenue

Note: The 2023 median revenue is not published to maintain confidentiality.
