

KYB solutions that power more confident decisions

Drive operational success with comprehensive identity insights that reduce costs and onboarding delays

coreIDENTITY offers a KYB solution that boosts efficiencies through an advanced machine learning, cloud-native platform and industry-leading data repository. By joining IDI's industry-leading consumer data and exceptional business data, our KYB APIs deliver superior coverage, particularly for sole-proprietorship and small businesses.

Instantly verify identities, seamlessly onboard new customers, and facilitate compliance requirements using continually refreshed consumer data that covers nearly 100% of the adult U.S. population.

Confidently verify businesses you're working with and the people behind them

Run traditional verifications using entity or business details or verify beneficial owners and officers that are linked to businesses

Perform KYC verifications on beneficial owners and officers and retrieve contextual information and fraud flags

The KYC APIs from coreIDENTITY offer a full range of identity match information including exact/partial/no match results, match and risk scores, and reason codes to optimize the customer journey while addressing fraud and privacy concerns.
